#	Points	Details
#1	1	Mention specifics of what concepts/topics were totally new to you.
#2	1	Mention specifics of what concepts/topics you already knew.
#3	1	Mention specifics of any topics you still don't feel confident about. If everything makes sense so far you can mention so.
#4	1	At least a few reasonable sentences.

Response:

Something that was completely new to me was the idea of a second dimensional array. All the concepts of declaring variables and initializing them as well as dealing with arrays and looping through them with for loops and for each loops is all very normal and known to me. I think PHP as a whole is still a little baffling to me in the way that the logic works and the wording of somethings but ill get used to it.
